MY PROMPTS

```
df = pd.read_csv('exported_files/crawl.csv')
training_comments1 = df['comment'][:50].to_string()
training_comments2 = df['comment'][25:50].to_string()

prompt1 = ("Hello, I would like you to  write me 50 new comments in Greek. Each comment is on a "
        "scale from 1 (non-toxic) to 5 (fully toxic). "
        "So, write me these 50 comments randomly and please I would like each class to have the same number of comments."
        "For this purpose you are provided with a set of example comments "
        "labeled with their corresponding toxicity scores. Note that I want 50 new comments in Greek. "
        "These are only examples in order to help you give me the 50 new comments. Thank you!"
        "Examples:"
        "Σχόλιο: Εκτιμώ την σκεπτική συζήτηση σε αυτό το νήμα."
        "Βαθμός Δηλητηρίασης: 1"

        "Σχόλιο: Παρά την διαφωνία με το όραμά σας, ας διατηρήσουμε τον σεβασμό στη συζήτηση."
        "Βαθμός Δηλητηρίασης: 2"

        "Σχόλιο: Η επιχειρηματολογία σας φαίνεται αδύναμη και έχει έλλειψη αξιόπιστων επιχειρημάτων."
        "Βαθμός Δηλητηρίασης: 3"

        "Σχόλιο: Είσαι απόλυτα ιδιώτης που και που προτείνει τέτοιες ανοησίες."
        "Βαθμός Δηλητηρίασης: 4"

        "Σχόλιο: Ελπίζω να υποφέρεις για τις ανόητες απόψεις σου."
        "Βαθμός Δηλητηρίασης: 5")

prompt2 = ('So based on the above comments and classification, I would like to classify the below comments'
        'from 1 (non-toxic)to 5 (fully toxic). So, you will give me 5 classes. Please provide me the output '
        'via a dictionary format. The key will be the class and the value will be a list of the integers that are'
        'in the beginning of each sentence. So the sentence 0 Ο "Εκπτωτος Άγγελος" μόλις κυκλοφόρησε και είμ... '
        'will be assigned in a class as 0.'
        'For example:'
        'class 1 (non-toxic): [1,7,13 etc]') + training_comments1

prompt3 = ('Moreover based on the above comments and classification, I would like to classify with the same '
        'pattern from 1 (non-toxic)to 5 (fully toxic) the below sentences. I will give you again an example'
        'For example:'
        'class 1 (non-toxic): [1,7,13 etc]') + training_comments2
